Joint Committee on Administrative Rules
Waylene Hiles
State Capitol, Room B8
Jefferson City, MO 65101

Re: Periodic rule review report pursuant to section 536.175, RSMo.

Dear Ms. Hiles:

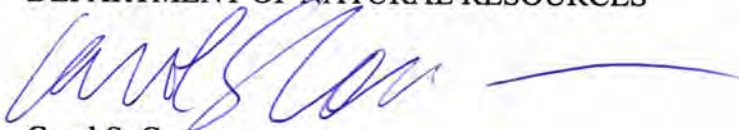

Enclosed you will find the Missouri Department of Natural Resources' periodic rule review report. The Department began its formal review on July 1, 2016, and is submitting this report to the Joint Committee on Administrative Rules and the Small Business Regulatory Fairness Board, as required by section 536.175, RSMo. This report also will be made available on the Department's website.

During its review, the Department identified a number of rules we intend to amend or rescind. We expect to identify more rules for amendment or rescission through the regulatory review the Department is just beginning pursuant to Executive Order 17-03.

Should you have any questions, feel free to contact Ms. Katie Jo Wheeler, General Counsel, by mail at P.O. Box 176, Jefferson City, MO 65102, by telephone at (573) 751-0323, or by email at katiejo.wheeler@dnr.mo.gov.

Sincerely,

DEPARTMENT OF NATURAL RESOURCES

Carol S. Comer
Director

CSC/jkm

c: Small Business Regulatory Fairness Board, *via email*

Missouri Department of Natural Resources Rule Review

2016

Director's Office

		1 - Does this rule continue to be necessary, taking into consideration the purpose, scope, and intent of the statute under which the rule was adopted?	2 - Is this rule obsolete, taking into consideration the length of time since the rule was modified and the degree to which technology, economic conditions, or other relevant factors have changed in the subject area affected by the rule?	3 - Does this rule overlap, duplicate, or conflict with other state rules, and to the extent feasible, with federal and local governmental rules?	4 - Could a less restrictive, more narrowly tailored, or alternative rule adequately protect the public or accomplish the same statutory purpose?	5 - Does this rule need amendment or rescission to reduce regulatory burdens on individuals, businesses, or political subdivisions or eliminate unnecessary paperwork?	6 - Does this rule properly incorporate material by reference?	7 - Does this rule affect small businesses? For rules affecting small businesses, state whether the public purpose or interest for adopting the rule justifies the continued existence of the rule.	Comments received?	Department Comments
	Date of Adoption or Last Amendment									
Number of Rules Reviewed										
2										
10 CSR 1-2.030 Minority and Underrepresented Scholarship Program	8/30/1998	No*	Yes	Yes	No	Yes	N/A	No	No	*The statutory authority for administration of this scholarship program was transferred to the Department of Higher Education in HB 1858 (2010). The Department plans to rescind this rule.
10 CSR 1-3.010 Consolidation of Permit Processing	5/30/2010	Yes	No	No	No	No	N/A	Yes*	No	*This rule benefits small businesses by providing a unified and streamlined permitting process when multiple environmental permits are needed.

Air Pollution Control

1 - Does this rule continue to be necessary, taking into consideration the purpose, scope, and intent of the statute under which the rule was adopted?

2 - Is this rule obsolete, taking into consideration the length of time since the rule was modified and the degree to which technology, economic conditions, or other relevant factors have changed in the subject area affected by the rule?

3 - Does this rule overlap, duplicate, or conflict with other state rules, and to the extent feasible, with federal and local governmental rules?

4 - Could a less restrictive, more narrowly tailored, or alternative rule adequately protect the public or accomplish the same statutory purpose?

5 - Does this rule need amendment or rescission to reduce regulatory burdens on individuals, businesses, or political subdivisions or eliminate unnecessary paperwork?

6 - Does this rule properly incorporate material by reference?

7 - Does this rule affect small businesses? For rules affecting small businesses, state whether the public purpose or interest for adopting the rule justifies the continued existence of the rule.

10 CSR 24-1.010 - General Organization	2/28/1997	Yes	No	No	Yes*	No	N/A	No	No	*The rule describes the general organization and role of the Department's Environmental Services Program and imposes no requirements upon the public. Portions of this rule may be required by § 536.023, RSMo, but other portions could be removed without adversely impacting the public or the environment.
10 CSR 24-2.010 - Definitions	1/29/1995	Yes	No	No	No	No	No*	Yes**	No	*The Department plans to evaluate and update the incorporations by reference to comply with Section 536.031, RSMo. **This rule is administrative in nature and provides important definitions for terms relating to hazardous substance emergencies. This protects public health by providing clear criteria about the types of releases of materials constitute an emergency and which do not.
10 CSR 24-3.010 - Emergency Notification Procedures	2/28/1997	Yes	No	No	No	No	No*	Yes**	No	*The Department plans to evaluate and update the incorporations by reference to comply with Section 536.031, RSMo. **The rule protects the public by requiring that persons having control over hazardous substance emergencies provide the Department with information on the material released and the risks to public health and the environment.

Missouri Department of Natural Resources Rule Review

2016

Hazardous Waste Program

1 - Does this rule continue to be necessary, taking into consideration the purpose, scope, and intent of the statute under which the rule was adopted?

2 - Is this rule obsolete, taking into consideration the length of time since the rule was modified and the degree to which technology, economic conditions, or other relevant factors have changed in the subject area affected by the rule?

3 - Does this rule overlap, duplicate, or conflict with other state rules, and to the extent feasible, with federal and local governmental rules?

4 - Could a less restrictive, more narrowly tailored, or alternative rule adequately protect the public or accomplish the same statutory purpose?

5 - Does this rule need amendment or rescission to reduce regulatory burdens on individuals, businesses, or political subdivisions or eliminate unnecessary paperwork?

6 - Does this rule properly incorporate material by reference?

7 - Does this rule affect small businesses? For rules affecting small businesses, state whether the public purpose or interest for adopting the rule justifies the continued existence of the rule.

Comments received?

10 CSR 40-2.050 - Topsoil Handling	1/13/1979	No*	Yes	Yes	Yes	Yes**	N/A	No	No	*All of Chapter 2 rules are no longer applicable because they are based on Missouri's Strip Mine Law (444.500-444.555) which was superseded by Missouri's Surface Coal Mining Law (444.800-444.940). The Department plans to rescind this unnecessary rule. **Rescission of this unnecessary rule will reduce the number of pages in the Code of State Regulations.
10 CSR 40-2.060 - Protection of the Hydrologic System by Water Quality Standards and Effluent Limitations	1/13/1979	No*	Yes	Yes	Yes	Yes**	N/A	No	No	*All of Chapter 2 rules are no longer applicable because they are based on Missouri's Strip Mine Law (444.500-444.555) which was superseded by Missouri's Surface Coal Mining Law (444.800-444.940). The Department plans to rescind this unnecessary rule. **Rescission of this unnecessary rule will reduce the number of pages in the Code of State Regulations.

Missouri Department of Natural Resources Rule Review

2016

Land Reclamation Program

		1 - Does this rule continue to be necessary, taking into consideration the purpose, scope, and intent of the statute under which the rule was adopted?	2 - Is this rule obsolete, taking into consideration the length of time since the rule was modified and the degree to which technology, economic conditions, or other relevant factors have changed in the subject area affected by the rule?	3 - Does this rule overlap, duplicate, or conflict with other state rules, and to the extent feasible, with federal and local governmental rules?	4 - Could a less restrictive, more narrowly tailored, or alternative rule adequately protect the public or accomplish the same statutory purpose?	5 - Does this rule need amendment or rescission to reduce regulatory burdens on individuals, businesses, or political subdivisions or eliminate unnecessary paperwork?	6 - Does this rule properly incorporate material by reference?	7 - Does this rule affect small businesses? For rules affecting small businesses, state whether the public purpose or interest for adopting the rule justifies the continued existence of the rule.	Comments received?	Department comments
10 CSR 40-2.070 - Dams Constructed of or Impounding Waste Material	1/13/1979	No*	Yes	Yes	Yes	Yes**	N/A	No	No	*All of Chapter 2 rules are no longer applicable because they are based on Missouri's Strip Mine Law (444.500-444.555) which was superseded by Missouri's Surface Coal Mining Law (444.800-444.940). The Department plans to rescind this unnecessary rule. **Rescission of this unnecessary rule will reduce the number of pages in the Code of State Regulations.
10 CSR 40-2.080 - Use of Explosives	11/13/1980	No*	Yes	Yes	Yes	Yes**	N/A	No	No	*All of Chapter 2 rules are no longer applicable because they are based on Missouri's Strip Mine Law (444.500-444.555) which was superseded by Missouri's Surface Coal Mining Law (444.800-444.940). The Department plans to rescind this unnecessary rule. **Rescission of this unnecessary rule will reduce the number of pages in the Code of State Regulations.
10 CSR 40-2.090 - Revegetation Requirements	11/23/1987	No*	Yes	Yes	Yes	Yes**	N/A	No	No	*All of Chapter 2 rules are no longer applicable because they are based on Missouri's Strip Mine Law (444.500-444.555) which was superseded by Missouri's Surface Coal Mining Law (444.800-444.940). The Department plans to rescind this unnecessary rule. **Rescission of this unnecessary rule will reduce the number of pages in the Code of State Regulations.
10 CSR 40-2.100 - Steep-Slope Mining Requirements	1/13/1979	No*	Yes	Yes	Yes	Yes**	N/A	No	No	*All of Chapter 2 rules are no longer applicable because they are based on Missouri's Strip Mine Law (444.500-444.555) which was superseded by Missouri's Surface Coal Mining Law (444.800-444.940). The Department plans to rescind this unnecessary rule. **Rescission of this unnecessary rule will reduce the number of pages in the Code of State Regulations.
10 CSR 40-2.110 - Prime Farmlands Performance Requirements	11/30/1990	No*	Yes	Yes	Yes	Yes**	N/A	No	No	*All of Chapter 2 rules are no longer applicable because they are based on Missouri's Strip Mine Law (444.500-444.555) which was superseded by Missouri's Surface Coal Mining Law (444.800-444.940). The Department plans to rescind this unnecessary rule. **Rescission of this unnecessary rule will reduce the number of pages in the Code of State Regulations.
10 CSR 40-3.010 - Signs and Markers - General Requirements	10/30/2000	Yes	No	No	No	No	N/A	Yes*	No	*This rule is necessary to ensure the Department maintains the permitting authority over coal mining and reclamation in Missouri under the federal Surface Mining Reclamation Act and to protect human health and the environment. This rule requires mine operators mark the different areas comprising an operation (i.e. active, buffer, and topsoil storage areas), which protects the public by requiring these practices.
10 CSR 40-3.020 - Requirements for the Casing and Sealing of Drilled Holes	10/30/2000	Yes	No	No	No	No	No*	Yes**	No	*The Department plans to evaluate and update the incorporations by reference to comply with Section 536.031, RSMo. **This rule is necessary to ensure the Department maintains the permitting authority over coal mining and reclamation in Missouri under the federal Surface Mining Reclamation Act and to protect human health and the environment.

10 CSR 70-1.010 - Organization	5/30/2008	Yes	Yes*	No	No	No	N/A	No	No	*Need to update contact information in part (2).
10 CSR 70-2.010 - Conduct of Referendums	12/17/1955	Yes	Yes*	Yes*	Yes	Yes	N/A	No	No	*There are now methods of electronic voting which make this rule obsolete. Revisions are also needed because the methods in the statutes are not only ineffective and outdated, but very restrictive. The continued existence of this rule is needed to ensure open and fair elections are conducted for locally-elected soil and water conservation district board supervisors. Amendments are needed to reduce complexity and increase voter turnout. Statutory amendments may be needed first.
10 CSR 70-2.020 - Conduct of Supervisor Elections	8/27/1987	Yes	Yes*	Yes*	No	Yes	N/A	No	No	*No amendments have been made since 1987. Terminology and voting methods are out of date.
10 CSR 70-3.010 - Formation of Soil and Water Conservation Subdistricts	8/22/1957	Yes	Yes*	Yes*	Yes*	Yes	N/A	No	No	*This rule is out of date and will be reviewed for necessary amendments.
10 CSR 70-4.010 - Definitions	4/11/1983	Yes	Yes*	No	No	Yes	N/A	No	No	*This rule is out of date and will be reviewed for necessary amendments.
10 CSR 70-5.010 - Apportionment of Funds	5/30/2008	Yes	Yes*	No	No	Yes	N/A	No	No	*The continued existence of this rule benefits agricultural landowners by providing financial incentives and guidance to install conservation practices to prevent soil erosion and protect water quality. This rule also benefits all citizens because reduced sediment runoff from fields leads to cleaner water and more productive farmland. The release of funds for apportionment is obsolete since funds are moved electronically.
10 CSR 70-5.020 - Application and Eligibility for Funds	10/30/1999	Yes	Yes*	No	No	Yes	N/A	No	No	*Terminology and forms are outdated as is the reference to the SALT program.
10 CSR 70-5.030 - Design, Layout and Construction of Proposed Practices; Operation and Maintenance	4/11/1983	Yes	Yes*	No	No	Yes	No**	No	No	*Terminology used for technical standards and specifications is outdated. **Incorporations by reference will be updated to comply with Section 536.031, RSMo.
10 CSR 70-5.040 - Cost-Share Rates and Reimbursement Procedures	1/30/2009	Yes	Yes*	No	No	Yes	N/A	No	No	*Documentation of costs has changed and forms described are obsolete.

ERIC R. GREITENS
GOVERNOR

CAROL R. EIGHMEY
EXECUTIVE DIRECTOR

May 23, 2017

Waylene Hiles, Director (via USPS and email to: waylene.hiles@senate.mo.gov)
Joint Committee on Administrative Rules
State Capitol, Room B8
Jefferson City, MO 65101

Dear Ms. Hiles:

As required by section 536.175, RSMo, the Board of Trustees for the Petroleum Storage Tank Insurance Fund has completed a review of its rules. Enclosed please find our report, which was formally approved by the Board at its meeting on May 17, 2017.

Should you have questions, please contact our executive director, Carol Eighmey, at pstif@sprintmail.com or 573-522-2352.

Sincerely,

A handwritten signature in black ink, appearing to read "James Greer". The signature is fluid and cursive, with a large, stylized initial 'J'.

James Greer
Chairman, PSTIF Board of Trustees

Report to the Joint Committee on Administrative Rules
From the Board of Trustees for the
Petroleum Storage Tank Insurance Fund
May 17, 2017

Each rule was evaluated using the eight criteria in section 536.175, RSMo. The results are presented below:

10 CSR 100-1.010 Organization

- 1) The rule is still necessary; it contains information the board is required by law to publish.
- 2) Though it has been in effect since 1999, the rule is not obsolete.
- 3) The rule does not overlap with, duplicate, or conflict with any other rules.
- 4) No alternative language or means of more narrowly tailoring the rule were identified.
- 5) Not applicable; the rule imposes no requirements.
- 6) The one statutory citation in the rule is accurate; no other text is incorporated by reference.
- 7) The rule assists small businesses and others in understanding the governance structure of the PSTIF and how to request information.
- 8) No comments were received.

10 CSR 100-2.010 Definitions

- 1) The rule is necessary; it imposes no requirements.
- 2) The rule has been timely amended to include new terms as the board's other rules have been amended. Two potential minor clarifications were identified during staff's internal review; the board will decide whether to make those changes in the next twelve months.
- 3) The rule does not overlap with, duplicate, or conflict with any other rules.
- 4) No alternative language or means of more narrowly tailoring the rule were identified.
- 5) Not applicable; the rule imposes no regulatory burden.

6) The rule currently incorporates definitions contained in 10 CSR 26-2.012, which was amended in early 2017. The board will decide in the next twelve months whether to eliminate this reference and instead explicitly define all terms used in its rules.

7) The rule assists small businesses and others in understanding the PSTIF Board of Trustees' operations.

8) No comments were received.

10 CSR 100-3.010 Transport Load Fee

1) The rule encapsulates information found in statute about the board of trustees, its authority to impose this fee, statutory limitations on the fee, and the board's fiduciary responsibilities. While the board of trustees could still operate under its statutory authority if this rule did not exist, it is the board's judgment that retaining the rule is helpful to the public.

2) The rule was last amended in response to statutory changes made by the Missouri General Assembly. It is not obsolete.

3) The rule does not overlap with, duplicate, or conflict with any other rules.

4) The rule is relatively brief; no alternative language or means of shortening it were identified.

5) The rule imposes no requirements beyond the explicit statutory requirement to pay the fee.

6) Statutory citations in the rule are accurate; no other text is incorporated by reference.

7) The rule imposes no requirements on small businesses beyond the statutory requirement to pay the fee.

8) No comments were received and no changes were identified during its internal review of the rule.

10 CSR 100-4.010 Participation Requirements for Underground Storage Tanks

1) The rule is necessary to explain how owners and operators of underground tanks can obtain insurance coverage from the PSTIF.

2) The rule has been amended four times since originally promulgated in 1999. The board's staff identified two wording changes which could clarify the board's operating

practices; the board will decide in the next twelve months whether to make those changes.

- 3) The rule does not overlap with, duplicate, or conflict with any other rules.
- 4) No alternative language or means of more narrowly tailoring the rule were identified.
- 5) Subsection (1)(D) of the rule specifies what documents must be submitted by UST owners/operators to obtain insurance coverage and/or renew it annually. The board has been diligent about coordinating its paperwork requirements with the DNR to avoid duplication. The DNR amended its UST rules in early 2017 and increased recordkeeping requirements for UST owners, so the board is currently re-evaluating its procedures and will finalize decisions in the next twelve months. The board will continue to coordinate with the DNR to assure the DNR and the PSTIF do not require duplicative paperwork from UST owners/operators.

In addition, the board identified one change that would reduce the paperwork burden when tank owners and operators renew their coverage; the rule will be amended in the next twelve months to incorporate this change.

- 6) Statutory and regulatory citations in the rule are accurate; no other text is incorporated by reference.
- 7) Small businesses benefit from being able to obtain affordable pollution liability insurance from the PSTIF; the continued existence of the rule is justified.
- 8) COMMENT: One comment was received from the Department of Natural Resources (DNR), suggesting the board continue insuring empty tanks for an indefinite period of time by deleting subsection (6)(F).

RESPONSE: In 2011, the DNR amended its UST rules to require site assessments within one year after an underground tank is emptied and to require empty USTs to be removed within five years. In coordination with the DNR, the board subsequently amended its rules to extend the period of time an owner/operator can preserve the opportunity to make a claim – i.e., the board extended that timeframe from six months to the five years specified in the DNR's rule. This is far more generous than any commercial insurer and allows ample opportunity for claims to be made. Further, the board believes it would be financially imprudent to extend the liability of the trust fund indefinitely after tanks are emptied and can no longer leak. Therefore, the board does not intend to change its rule in response to this comment.

10 CSR 100-4.020 Participation Requirements for Aboveground Storage Tanks

- 1) The rule is necessary to explain how owners and operators of aboveground tanks can apply for and obtain insurance coverage from the PSTIF.

- 2) The rule has been amended five times since originally promulgated in 1999. The board's staff identified one change that may clarify the board's operating policies; the board will decide in the next twelve months whether to make that change.
- 3) The rule does not overlap with, duplicate, or conflict with any other rules.
- 4) No alternative language or means of more narrowly tailoring the rule were identified.
- 5) One option for reducing paperwork was identified. The board will amend the rule in the next twelve months.
- 6) Statutory and regulatory citations in the rule are accurate; no other text is incorporated by reference.
- 7) Small businesses benefit from being able to obtain affordable pollution liability insurance from the PSTIF; the continued existence of the rule is justified.
- 8) COMMENT: One comment was received from the Department of Natural Resources (DNR), suggesting the board continue insuring empty tanks for an indefinite period of time by deleting subsection (6)(F).

RESPONSE: The board's rule for AST owners/operators matches the board's rule for UST owners/operators discussed above. I.e., the board allows insured owners/operators to preserve their opportunity to make a claim for five years after their insured tanks are emptied; this is significantly more generous than commercial insurers. The board believes this is an adequate period of time for the facility owner to make business decisions about the property and that it would be financially imprudent to extend the liability of the trust fund indefinitely. Therefore, the board does not plan to change its rule in response to this comment.

10 CSR 100-5.010 Claims for Cleanup Costs

- 1) The rule remains necessary.
- 2) The rule has been amended three times since initially promulgated in 1999. During its internal review, the board identified informational statements in the rule related to activities that occurred in the 1990's; while the statements are still accurate, they may no longer be necessary, given the passage of time. The board will decide in the next twelve months whether to remove these references.
- 3) The rule does not overlap with, duplicate, or conflict with any other rules.
- 4) No alternative language or means of more narrowly tailoring the rule were identified.
- 5) No opportunities to amend the rule to reduce paperwork were identified.

6) Statutory and regulatory citations in the rule are accurate; no other text is incorporated by reference.

7) Significant economic benefits accrue to all Missourians, including small businesses, from the board's reimbursement of costs to clean up tank sites; the continued existence of the rule is justified.

8) Two comments were received from the Department of Natural Resources (DNR).

COMMENT: The first comment suggests an amendment to paragraph (4)(B)3 and relates to the DNR's comments on 10 CSR 100-4. DNR suggests the board require owners/operators to maintain participation in the trust fund until all previously-insured tanks at the site are permanently closed, regardless of how long the tanks are empty.

RESPONSE: As discussed above, the DNR's suggestion would obligate the board and the trust fund indefinitely for properties where tanks have not been used for many years. The board does not believe it is fiscally prudent or necessary to grant a perpetual right to make a claim for a property where it previously insured a tank owner or operator who was actively storing fuel in tanks.

It is worth noting that, in 319.131.9 and 319.131.10, RSMo, the General Assembly specified that the trust fund is liable for cleanup of a finite group of properties *where tanks were emptied by December 31, 1997*. The trustees find no statutory basis for assuming the General Assembly granted them authority to expand this group of properties indefinitely to include all sites where tanks are emptied on any subsequent date.

Further, the board notes there is no definition of what "permanently closed" means for aboveground tanks; therefore, amending this rule as suggested by the DNR would make the meaning of the rule unclear.

Finally, it is noted the General Assembly has authorized the Departments of Natural Resources and Agriculture to promulgate financial responsibility requirements for tank owners, not the PSTIF Board of Trustees. The board believes amending its rule as DNR suggests might exceed its statutory authority and usurp authorities granted to other state agencies.

For these reasons, the board does not plan to change its rule in response to this comment.

COMMENT: The DNR's second comment suggests language be added to the rule declaring certain costs eligible.

RESPONSE: The board believes the proposed additional language is unnecessary and would be redundant. The board's rules already specify payment will be made for "eligible, reasonable, and necessary costs incurred to characterize the extent of and

assess the risks posed by...a release from a petroleum storage tank” and costs incurred for corrective actions taken in accordance with state or federal regulations in response to a release from a petroleum storage tank.” Therefore the board does not plan to change its rule in response to this comment.

10 CSR 100-5.020 Claims Appeal Procedure

- 1) The rule provides a means for resolving disputes over the amount of money reimbursed by the board’s staff and agents without employing an attorney. It has worked well and has been used 785 times in the twenty years of the board’s existence, during which time more than 21,000 claim checks have been issued. Therefore, the rule remains necessary as long as the General Assembly wants the board to continue operating.
- 2) Though it has been in effect since 1999, the rule is not obsolete.
- 3) The rule does not overlap with, duplicate, or conflict with any other rules.
- 4) No alternative language or means of more narrowly tailoring the rule were identified.
- 5) Other than deadlines for appeal, the rule imposes no requirements. The board believes the deadlines are reasonable. Please note the rule also specifies deadlines for response by the board and its staff.
- 6) The one statutory citation is accurate; no other text is incorporated by reference.
- 7) As noted in #1 above, the rule provides a benefit by establishing an explicit procedure for exhausting administrative remedies, thus benefiting all Missourians, including small businesses.
- 8) No comments were received and no changes were identified by the board of trustees during its internal review.

10 CSR 100-5.030 Third-Party Claims

- 1) The rule remains necessary.
- 2) Though it has been in effect since 1999, the rule is not obsolete.
- 3) The rule does not overlap with duplicate, or conflict with any other rules.
- 4) No alternative language or means of more narrowly tailoring the rule were identified.
- 5) The rule is mostly informative; it imposes no particular regulatory burdens.

6) The reference to one section of 10 CSR 100-5.010 needs to be updated; the board will do so in the next twelve months. No other text is incorporated by reference.

7) The rule contains reasonable and flexible procedural requirements for accessing third party claim coverage provided by the board. Most other limitations in the rule explicitly match those specified in state law.

8) No comments were received.

10 CSR 100-6.010 UST Operator Training

1) The rule remains necessary.

2) The rule is relatively new, having been originally promulgated in 2015 in response to legislation enacted by the General Assembly in 2011. One clarification was identified during internal review and will be made in the next twelve months.

3) The rule does not overlap with duplicate, or conflict with any other rules.

4) No alternative language or means of more narrowly tailoring the rule were identified.

5) The rule was initially designed to minimize the regulatory burden and cost imposed on underground storage tank owners and operators. Experience indicates it has done so; no opportunities for improvement in that regard were identified.

6) Regulatory citations in the rule are accurate; no other text is incorporated by reference.

7) Unless/until federal requirements are changed, the continued existence of the rule is necessary to maintain the State's primacy in regulating underground storage tanks.

8) No comments were received.

Subject: RE: 5-year review rule comments

The Department's Division of Environmental Quality submits the following suggestions for consideration:

We recommend the entirety of 10 CSR 100-4.010 (6)(F) be deleted. Tanks Owners and operators should be required to maintain PSTIF coverage until the tanks are permanently removed from the ground. Requiring tank owners pay fees to remain in the PSTIF will encourage them, along with enforcement from DNR, to remove the tanks from the ground.

There is a corresponding language for AST's in 10 CSR 100-4.020(6)(F) that should also be eliminated. Although there are no closure requirements for ASTs, maintaining insurance until they are

removed will be more protective of the environment.

10 CSR 100-5 (4) (B) 3, should be modified as follows: "In order to maintain its status as an eligible site, the owner or operator of any petroleum storage tanks at the site must maintain participation in the fund ~~as long as such tanks are in use~~ **until such time as the tanks are permanently closed**. Failure to do so shall result in the site becoming ineligible; costs incurred after the date of cancellation or nonrenewal of participation in the fund are not eligible. Should the owner or operator elect to participate in the fund again, he or she may become eligible under subsection (4)(A) for any new release."

Lastly, a new section should be added to 10 CSR 100-5.010(8):

"(G) All reasonable costs incurred in responding to a request or order from the Department of Natural Resources that are necessary to provide adequate site characterization, risk assessment, corrective action, or other relevant information are deemed eligible."

~~(G)~~ **(H)** The board reserves the right to reject any proposed costs or estimates if, in the opinion of the board and at its sole discretion, such costs are ineligible, unreasonable, or unnecessary."

AIR POLLUTION CONTROL PROGRAM

10 CSR 10-2.230 Control of Emissions From Industrial Surface Coating Operations

COMMENT: The U.S. Department of Energy (DOE) National Nuclear Security Administration (NNSA) Kansas City Field Office (KCFO) submitted comments on the Kansas City area rule 10 CSR 10-2.230, Control of Emissions From Industrial Surface Coating Operations. NNSA considers the applicability of the rule overly conservative and burdensome in comparison to a similar rule for the St. Louis area and suggests clarifying confusing language. The commenter also points out that the difference in exemptions between the St. Louis and Kansas City gives St. Louis area businesses an unfair business advantage. In particular, NNSA pointed out that the addition of an exemption for military specification coatings to the Kansas City area rule would lead to fair competition when competing with St. Louis area businesses for military contracts. Finally, NNSA suggests additional language similar to that in the St. Louis area rule further clarifying the applicability of the rule.

RESPONSE: The Missouri Department of Natural Resources' Air Pollution Control Program (air program) is reviewing NNSA's comments and considering various options. Due to inclusion of this rule in the Missouri State Implementation Plan (SIP), it is necessary to work with the Environmental Protection Agency (EPA) to ensure all changes to the rule maintain compliance with the SIP and other Clean Air Act requirements. The air program also considers how changes to rules affect all businesses subject to the rule and other stakeholders.

Clarification of language typically benefits all stakeholders; therefore, an amendment of the confusing language in the applicability section is highly likely. Change to the applicability requirement needs to be evaluated for its effect on the state's SIP obligation to maintain the current level of air quality protection. Finally, adding a new subsection further clarifying the applicability of the Kansas City rule is highly probable. The air program supports copying language from the St. Louis rule stating "the rule is only applicable to the surface coating of manufactured items intended for distribution in commerce to persons other than the person or legal entity performing the surface coating" to the Kansas City rule as suggested.

Overall, the emission limits in the General Provisions section of the St. Louis area rule are stricter than the Kansas City area rule. But, the St. Louis area rule provides several exemptions that are not equivalent in the Kansas City area rule. Exemptions generally pose a high hurdle for justification to ensure adequate of air quality protection. The addition of all the exemptions found in the St. Louis area rule to the Kansas City area rule is not possible without increasing the stringency of the emissions limitations in the General Provisions. The air program supports the inclusion of the single specific exemption requested. Adding the equivalent exemption for military specification coatings to the Kansas City area rule will remove the competitive disadvantage and ease the burden of complying with emission limitations while also ensuring the rule remains protective of air quality.

The air program appreciates comments from all stakeholders and looks forward to continued efforts with NNSA and EPA to finding the best possible solutions for all stakeholders while protecting air quality for the health, general welfare, and property of the citizens of Missouri.

10 CSR 10-6.062 Construction Permits by Rule

COMMENT: The Boeing Company of St. Louis submitted a comment on 10 CSR 10-6.062, Construction Permits By Rule. The rule creates a process by which sources can be exempt from 10 CSR 10-6.060, Construction Permits Required, by establishing conditions under which specific sources can construct and operate. Boeing recommended adding a permit-by-rule category for industrial, commercial, and institutional (ICI) boilers and process heaters fueled exclusively with natural gas or liquefied petroleum gas with a capacity of 10 million Btu per hour heat input or greater, but less than 100 million Btu per hour.

RESPONSE: The Missouri Department of Natural Resources' Air Pollution Control Program (air program) is reviewing Boeings comment and considering various options. Due to inclusion of this rule in the State Implementation Plan (SIP), it is necessary to work with the Environmental Protection Agency (EPA) to ensure all changes to the rule maintain compliance with the SIP and other Clean Air Act requirements. The air program also considers how changes to rules affect all businesses subject to the rule as well as other stakeholders.

While the suggested criteria for the permit-by-rule for this category of ICI boilers and heaters is one possibility, the air program believes it may be necessary to further limit the capacity of these units so that all pollutant emissions remain below the de minimis level. The air program is evaluating this and other options to address this comment.

The air program appreciates comments from all stakeholders and looks forward to continued efforts with Boeing and EPA to finding the best possible solutions for all stakeholders while protecting air quality for the health, general welfare, and property of the citizens of Missouri.

WATER PROTECTION PROGRAM

10 CSR 20-6.100 General Pretreatment Regulation

3V Corporation submitted the following comments. Although the commenter did not identify a particular rule, the comments seem to focus on 10 CSR 20-6.100, General Pretreatment Regulation.

COMMENT: According to staff of the Department of Natural Resources, the regulations appear to limit pretreatment systems to municipal wastewater systems and appear to hold all industrial waste, even environmentally inert materials, to the same high standards. This puts a tremendous burden on small businesses who do not have access to municipal systems. In our industry, the environmentally inert waste materials would quickly clog our lines. Therefore, the industry uses widely available, bucket trap systems to capture nearly all of the environmentally inert waste material. Additionally, we use a small settling tank for anything that gets by the trap. This tank has never filled in over 30 years.

RESPONSE: The clean water regulations for pretreatment (10 CSR 20-6.100) are intended to prevent the introduction of pollutants in publicly owned treatment works (POTW) which

will interfere with the operation of the POTW, promote recycling or reuse of waste byproducts, and ensure the safety of POTW employees. A key part of this process is ensuring the POTW has a National Pollutant Discharge Elimination System (NPDES) permit, and the waste discharged from the POTW is meeting the limits outlined in the permit. While there are no specific pretreatment rules for non-POTW wastewater treatment plants, the real key for these facilities is the same - that they have an NPDES permit and are ensuring the waste discharged from their treatment plant is meeting permit requirements. If your industry is discharging wastewater after the treatment described above, then that discharge requires an operating permit. This is a requirement of the Missouri Clean Water Law Section 644.051.1 and Missouri Clean Water Commission regulation 10 CSR 20-6.010. Operating permits contain terms and conditions that ensure the discharge is protective of the state's water quality, including both narrative and numeric criteria. The permitting requirement is independent of the pretreatment regulations. The treatment you describe may or may not provide adequate treatment to protect the environment and would be reviewed during the permitting process. As previously mentioned, pretreatment facilities are also sending their treated waste to a permitted POTW for final treatment before discharge. The pretreatment itself does not provide adequate treatment to ensure final water quality requirements are met.

COMMENT: Of course, we would love to be connected to the local municipal wastewater system. Apparently, this magically takes care of the pretreatment issues. Someday we will.

RESPONSE: When connected to a municipal or other POTW, industries/businesses no longer need to have their own permitted wastewater treatment system, but instead must meet requirements of the system to which they are connected. Discharges to POTWs are exempt from state permitting requirements by law. They may or may not need a pretreatment system depending on the components in the waste being sent to the POTW.

COMMENT: Until then, DNR should be able to review and permit private pretreatment systems so that Missouri small businesses don't have to spend large amounts of money to deal with non-existent environmental issues.

RESPONSE: The systems you describe can be permitted but the permit is needed for the discharge from those systems rather than the pretreatment that you describe.

HAZARDOUS WASTE PROGRAM

10 CSR 26-2.080 – Risk Based Target Levels

COMMENT: The Missouri Petroleum Storage Tank Insurance Fund (PSTIF) submitted comments on 10 CSR 26-2.080, Risk Based Target Levels. PSTIF commented that the rule should be rescinded as it contains outdated references and is therefore obsolete.

RESPONSE: The Department of Natural Resources agrees that this rule contains outdated references. The Department recommends the rule be amended to remove the outdated references, rather than rescinded.
